Brand and Website Design for NNWI

At wepeak, we focus on creating meaningful and impactful designs for our clients. We created a visually appealing and recognizable brand for NNWI, using vibrant colors and an atom concept to symbolize strength and sustainability.

About NNWI

NNWI is an industry supported think-tank, focused on the international development of nuclear energy as a means for governments to safeguard their long term sustainable energy needs. We strongly believe that nuclear is vital to achieving binding Paris Climate Agreement objectives and tackling the challenge of climate change.

Our aim is to improve the world's understanding of nuclear power and its far-reaching benefits and applications.

Encourage the widest possible and best informed debate about energy and climate change

Supporters Network

NNWI aims to enhance international dialogue for a better future energy mix and highlight leading views on combating climate change. We provide an excellent opportunity to debate clean energy research and efficiency and investment in energy infrastructure for the nuclear industry and offers the opportunity to listen to other government, industry and academia professionals.
